Biological activities of broccoli (*Brassica oleracea* var. *italica*) such as antioxidative, antimicrobial, and anticarcinogenic effects have been reported. The aim of this work was to optimize and validate ultrasound-assisted extraction (UAE) of glucosinolates (GLSs), phenolic compounds, and flavonoids from broccoli florets. Extraction yields were investigated for different times, ultrasonication temperatures (20-50°C), and the ratio of solvent to solid (0.5-1:1 v/w). The highest glucosinolate yield ( $3.33\% \pm 0.11$ ) was obtained at 50°C for 10 min. Chlorogenic acid, flavonoids, and GLSs yields increased as the ultrasound power increased. However, the yields did not show a linear correlation between the solvent-solid ratio and yield, and a maximum yield ( $2.03 \pm 0.09\%$ ) was obtained at a solvent-solid ratio of 1:2. The obtained yield for total phenolics and flavonoids was  $0.31 \pm 0.10$  and  $0.21 \pm 0.09\%$ , respectively. Moreover, significant linear correlations were observed between the maximum peak areas of the GLSs, phenolic compounds, and flavonoids in the

A: Check if in your Oracle account/Access account is an option to manage users and passwords. If so, go to that page, enter your Oracle username/password, and try to add a new account, you might be able to add it using that, or at least create a new user with the same account and password you are using. However, since you are having issues getting your license manager to work, I suggest that you get a new computer. Independent Inquiry into Child Sexual Abuse (IICSA) IICSA – the Independent Inquiry into Child Sexual Abuse - is an independent, statutory inquiry set up by the United Kingdom government in 2014 to investigate child sexual abuse. IICSA is the only UK inquiry into child sexual abuse that does not require service-users (for example, survivors of sexual abuse) to make their identities known. The inquiry is run by Lady Butler-Sloss, a former senior judge. History After the findings of the Francis report into sexual abuse in the 1980s and 1990s in the Church of England, which found that hundreds of children had been abused over decades and that there had been a conspiracy to cover up the abuse, the government appointed Lord Butler-Sloss, a retired High Court judge, to chair the independent inquiry into child sexual abuse in England and Wales. On 1 July 2014, the Department for Education and Department for Culture, Media and Sport published a joint announcement that the then Attorney General, Mark Qureshi, had commissioned an inquiry into historic allegations of abuse in schools and on the residential childcare and early years settings in England and Wales. This followed evidence in the Francis Report that the Catholic Church in England and Wales had had a deliberate policy of protecting and concealing child abusers. On 9 July 2014, the Prime Minister, David Cameron, announced that the inquiry would be led by Lady Butler-Sloss. IICSA published its first report in September 2015. Membership The inquiry is chaired by Lady Butler-Sloss, former senior judge at the High Court of Justice. Other members include; The inquiry was initially led by Lord Freud, a senior Liberal Democrat politician. However, he resigned in January 2016 because of an error in his police record. This error was later
