In a report published on Thursday, Dr Stefan Orton said that a high number of people were being given an infection that needs only one dose of the vaccine to prevent. Dr Orton said: "This is extremely worrying and it highlights the need for all agencies to continue the ongoing work of providing vaccination for as many people as possible." "It is vitally important that everyone in the community, including family and friends of people who have hepatitis B, are made aware of the preventative measures we have to offer, and all agencies continue to work to ensure that this is done." According to the report, there has been a steady increase in cases of the infection since 2014. Whilst over 56 per cent of the new cases each year have been linked to sex between men, another 40 per cent of cases are thought to be related to drug use and 6 per
