Keymacro is a utility for changing windows keyboard shortcuts with

your custom commands.

Keymacro is a replacement for the standard shortcut-changing tool that comes with Windows (keyboard settings). It provides many new features which you will find useful in your day-to-day work. The program allows you to map keyboard shortcuts to any application, website, folder, etc. Keymacro is not only a shortcut editor. You can also save your customized keyboard shortcuts as "shortcut scripts" and load them again. It offers advanced options

that include support for multiple active shortcuts, a built-in system tray icon, tabbed control mode, and a history list. Keymacro also works great with AutoHotkey, and it offers extensive customization options for that scripting language. Save your programs and websites into keyboard macros Keymacro automatically saves each changed keyboard shortcut into a.kmk (keymacro) file. With the program's powerful search feature you can quickly re-open any of these files. Edit multiple keyboard

shortcuts at once Keymacro supports multiple active shortcuts. You can bind one or more keyboard shortcuts with a hotkey, and when you press that hotkey, the active shortcuts get highlighted. View or change keyboard shortcut settings easily You can view and change keyboard shortcuts by simply clicking on the shortcut text in the main window. You can also change the shortcut keys by using up/down arrow keys. Send the shortcut to clipboard You can

copy the shortcuts to the clipboard using a keyboard shortcut or by pressing the "C" key and then the hotkey of the shortcut. Save your keyboard macros into the registry. You can save the keyboard shortcuts into the registry. If you forget to save a shortcut or want to save it into a different location, you can do it easily. Exchange keyboard shortcuts between programs. Keymacro supports a special feature that lets you easily exchange keyboard shortcuts between two different programs.

This allows you to map an application shortcut to an existing keyboard shortcut that you have previously used for an unrelated application. Keymacro comes with the best keyboard shortcut editor for Windows. You can use it to quickly edit multiple keyboard shortcuts at once, send keyboard shortcuts to the clipboard, and save keyboard macros to the registry.
