
Despite the fact that IntelliJ IDEA is an integrated development environment for Java, it also understands and provides intelligent coding assistance for a large number of other languages – such as SQL, JPQL, .NET, Groovy, Ruby and Go. As a result, many Java developers are looking for alternatives to using IntelliJ IDEA for other programming languages. One such language is Python, which is one of the most popular programming languages – with which IntelliJ IDEA is tightly integrated. And with this new Python Text Inspector feature, IntelliJ IDEA allows you to modify the text in .pyd files so you can track and optimize your Python code.
