MiraSpace v2.3.0 Crack Incl. [Latest]. A: As indicated in the comments, this is a corrupted video from xnview (the GUI app to play local videos) which is one of the most popular tools for playing and organizing video files. There are a few possible causes: The disc has errors which might corrupt the file. If this is the case, the game is completely playable with a standard DVD drive. The video file is damaged beyond repair. In that case, you won't be able to play the game even with a DVD drive.

The disc was burned with errors or a faulty burner. Depending on the CD drive, the disc might not play at all. This is the case with some CD/DVD drives and DVD+RW drives, which are notorious for corrupting media. The only solution is to use a different, clean drive for playing the game. A: Based on the output of my own investigation - it seems like the problem is with the source media, not with the game itself. I have been able to play the game on other discs I have burned using the same combination of tools. This disc (MAME version) is only playable on my disc drive, on any other drive it will just be an undecipherable mess. There are three possible reasons why this might be: the disc drive is experiencing problems the disc drive is damaged the disc drive is somehow corrupting the disc Answering in order from most likely to least likely: the disc drive is experiencing problems - like it skipping from track to track, or not reading the disk at all. These things are common and easy to diagnose, and they should
